SERVING THE QUALITY WITH ENGINEERING & TECHNOLOGY

About Us

At N&T Engitech, we craft top-quality technology and spare parts for multiple industries. This includes providing the best quality parts needed in Oilseeds, Oil, and fat Technology, such as crushing, extracting, refining, and byproduct plants.

Our products bear a mark of excellence and our team force is knowledgeable enough to guide you with the right spare for the right plant to ensure a high level of technical clearance.

We'll have you covered from start to finish with best-in-class engineering, procurement, and construction solutions for various industries across the globe.

Our team's commitment to precision, reliability, and innovation in every project has resulted in 100+ satisfied clients in 25+ countries.

Apart from manufacturing the machinery, we also help you gain proper access to spare parts that seamlessly integrate with their current set of tools.

Our scope of work, even in the manufacturing and supply of spare parts, goes beyond delivery. We provide ongoing support, perform system optimization, run failure analysis, and ensure performance enhancements to help you attain maximum return on investment.

At N&T Engitech, we're redefining what's possible in engineering the future of Oilseeds, oils & fats processing, one innovation at a time.
